

Where Golf *Meets Innovation*

PUTTING GREEN BUYER'S GUIDE

Out of over 100 brands tested,
SYNLawn ranked #1 in golf performance!

An Official Partner

Synthetic putting greens have become a staple for golf enthusiasts, residential homeowners, commercial venues, and sports training facilities. SYNLawn Golf leads the industry with highly advanced artificial turf systems designed to deliver true performance, visual appeal, and long-term durability.

Out of over 100 brands tested, SYNLawn ranked #1 in golf performance becoming the top choice for the brand-new indoor golf league TGL!

TRUE BALL ROLL

Engineered to mimic the finest championship greens in the world, SYNLawn putting surfaces deliver tour-quality bounce, spin, and roll.

MINIMAL MAINTENANCE

Say goodbye to mowing, watering, and fertilizing. Synthetic greens require only occasional brushing and debris removal.

ALL-WEATHER DURABILITY

Built-in UV protection and top-grade materials allow SYNLawn greens to thrive in hot, cold, wet, or dry conditions.

CUSTOMIZABLE EXPERIENCE

From flat practice pads to undulating terrain with multiple cut levels, every green is tailored to your needs.

PRODUCT SELECTION

Precision Putt®

Classic Pitch

Classic Putt

SYNAugustine 847

SYNRye 200

SYNAugustine X47

SYNLawn Golf offers a full spectrum of turf systems for every level of play and application.

PUTTING SURFACES:

- **Precision Putt®:** #1 preferred putting surface offering consistent speed and authentic roll.
- **Classic Pitch:** Designed for chipping and pitching up to 160 yards with TrueStop™; durable and realistic.
- **Classic Putt:** Great for multi-use and heavy traffic areas, including putting courses and tee boxes.

FRINGE & COLLAR OPTIONS:

- Realistic transition zones using products like SYNAugustine 847, SYNTipede 243, and SYNRye 200 to replicate natural roughs and collars.

ADDITIONAL SURFACE TYPES:

- **Rough:** Products like SYNAugustine X47 and SYNfescue 70 create tournament-style thick grass.
- **Tees:** SYNLawn Tee Strike allows the use of real golf tees.
- **Fairways:** Blended turf systems for extended chipping and approach practice.
- **Bunkers & Hazards:** Tan and white SYNsport options emulate sand; blue turf mimics water hazards.

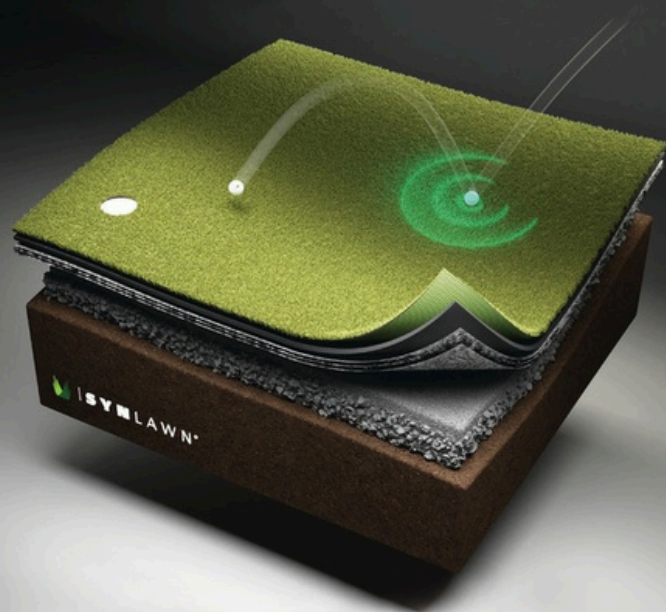

SYNSport White & Tan (Vegas Gold)

TRUESTOP™ SYSTEM

Synthetic turf is not new to golf, but having accurate bounce, check, and roll has been difficult to achieve, until the advent of our TrueStop™ system. Built to reconstitute energy while maintaining natural play on the green, our new TrueStop™ is designed as a receiving surfacing which easily handles shots from more than 160 yards out.

Our proprietary underlayment comprised of breakthrough technology gives you the most realistic playing experience possible.

TEE STRIKE

Tee Strike Turf by SYNLawn Golf is a professional-grade artificial grass designed for tee lines, tee boxes, golf simulators, and chipping areas. Made with dense, 100% nylon fibers, it supports real tees and full swings without grabbing the clubhead. With a one-inch pile height and 120 oz. face weight, Tee Strike delivers true ball flight, realistic feel, and long-lasting durability—making it ideal for both commercial golf facilities and home installations.

"SYNLawn Tee Strike hitting turf is so realistic, I look for a divot after every shot!"

Dave Kubiak
Bettinardi Golf Tour Director
& GM of Studio

THE NYLON ADVANTAGE

NYLON GREENS **PERFORM BETTER THAN POLYPROPELENE**

APPROACH SHOT ACCEPTANCE

NYLON GREENS **PROVEN BETTER!**

When properly installed, nylon greens accept approach shots much like natural greens—no need for excessive sand.

POLYPROPYLENE GREENS

Shots stop abruptly, more like hitting a sand trap than a true green.

CHIP SHOTS

NYLON GREENS **PROVEN BETTER!**

Chipped balls check and roll realistically with SYNlawn's Precision Putt® and Classic Pitch surfaces.

POLYPROPYLENE GREENS

Inconsistent roll and off-line results, unlike natural greens.

PUTTING PERFORMANCE

NYLON GREENS **PROVEN BETTER!**

Delivers true roll with minimal wobble and off-line deviation—mimics natural grass best.

POLYPROPYLENE GREENS

Unpredictable, especially on short putts. Inconsistent roll and ball wobble as it slows.

MAINTENANCE

NYLON GREENS **PROVEN BETTER!**

Low maintenance with no need for heavy sand infill.

POLYPROPYLENE GREENS

Requires frequent sand replenishment and compacted sand can affect performance over time.

DESIGN & INSTALLATION

Every aspect of a SYNLawn installation is **fully customized to your vision**,
delivering a truly professional, high-end experience tailored just for you.

DESIGN PHASE:

- Custom shapes, slopes, elevations, and cut levels.
- Integration of bunkers, fringe, fairway, or water features.
- Color and texture matching to existing landscaping or course inspiration.

INSTALLATION PROCESS:

1. **Site Assessment:** Evaluating drainage, grade, and layout.
2. **Base Preparation:** Grading and compacting sub-base with aggregate.
3. **Turf Laying:** Seamlessly positioning and securing the turf.
4. **Cutting & Seaming:** Precision trimming and adhesive work.
5. **Infill Application:** Using silica sand or specialized blends.
6. **Pin Placement:** Final placement of cups, flags, and accessories.

APPLICATIONS

INDOOR & OUTDOOR GREENS

SYNLawn Golf specializes in high-performance putting greens for both indoor and outdoor use, featuring premium nylon turf engineered for true ball roll, consistent speed, and minimal off-line deviation. Trusted by PGA professionals and coaches, these maintenance-free greens require no mowing, watering, or fertilizing, and are custom-designed to elevate your space into a golfer's paradise.

GOLF SIMULATORS

SYNLawn's golf simulator turf is engineered with premium nylon fibers to replicate the look and feel of real tee lines, rough, or fringe, delivering pro-level realism for indoor simulator use. Trusted by top launch-monitor brands and preferred by golf instructors, this turf offers consistent ball behavior and durability, making it perfect for residential and commercial simulation setups.

MINI GOLF COURSES

SYNLawn designs and installs custom artificial turf systems for mini golf courses that combine fun, durability, and professional-grade performance. From family-friendly entertainment venues to boutique mini golf attractions, SYNLawn's low-maintenance surfaces—like Precision Putt®—deliver true ball roll, creative contours, and long-lasting visual appeal.

DRIVING RANGES & TEE LINES

SYNLawn Golf offers purpose-built synthetic turf solutions for driving ranges and tee lines, including Tee Strike and SYNRangePro—engineered from 100% nylon fibers for exceptional durability, true-to-life feel, and consistent ball feedback. Trusted by PGA professionals and design teams, these systems enable realistic full swings and accurate launch performance with minimal maintenance, making them ideal for both commercial facilities and residential setups.

THE IMPORTANCE OF A GREENSMaster™ CERTIFIED INSTALLER

What does this mean?

The SYNLawn GreensMaster™ certification program was developed to ensure the highest standards of craftsmanship, design principles, and engineering specifications in synthetic golf green installations.

Here's why the GreensMaster Certification matters and why choosing a SYNLawn GreensMaster Certified installation expert is essential for any serious golfer.

- ✓ ADVANCED BASE PREPARATION
- ✓ LANDSCAPE INTEGRATION
- ✓ PRECISION SEAMING
- ✓ QUALITY INSTALLATION MATERIALS
- ✓ ONGOING TRAINING

**OUR GREENSMaster CERTIFIED
INSTALLATIONS ENSURE THE BEST
CONDITIONS FOR YOUR GAME.**

COST & VALUE

The investment in a SYNLawn putting green is offset by its *longevity, performance, and added property value.*

KEY COST FACTORS:

- Size of the green (square footage).
- Terrain complexity (undulations, bunkers, multi-cut areas).
- Installation environment (indoor/outdoor, soil condition).
- Optional features (lighting, fringe zones, accessories).

VALUE DRIVERS:

- ✓ **Property Enhancement:** Increases resale appeal and outdoor functionality.
- ✓ **Year-Round Practice:** No seasonal downtime.
- ✓ **Return on Investment:** Saves on greens fees, fuel, and facility memberships.
- ✓ **Warranty:** Limited lifetime warranty protects your purchase against UV breakdown and fiber degradation.

Why Choose GreensMaster Certified Installers?

ENHANCED GOLF EXPERIENCE

CUSTOMER SATISFACTION

QUALITY ASSURANCE

LONGEVITY & VALUE

TRUSTED EXPERTS

SYNLAWN: THE FUTURE OF GOLF

SYNLawn is proud to be the first and only Official Synthetic Surface Partner of TGL, the groundbreaking golf league founded by Tiger Woods and Rory McIlroy. SYNLawn partnered with TGL to combine virtual technology and live gameplay on our surfaces to redefine the game of golf, pushing boundaries with innovation, precision, and excitement. When you choose SYNLawn, you choose the same synthetic turf trusted by TGL to meet the highest performance standards in the world. Whether for golf simulators, putting greens, practice facilities, adventure putting courses, and even full-scale golf courses, SYNLawn delivers championship-level quality tailored to your needs.

TRUSTED BY TGL. BUILT FOR YOU.

UNMATCHED PLAYABILITY

Realistic ball bounce, check, and roll replicate the performance of natural grass greens for professional-level practice and play.

DURABLE & RELIABLE

SYNLawn Super Yarn and Nylon Advantage technology are engineered to endure the highest performance demands at any level, under any conditions, in any climate.

ECO-FRIENDLY INNOVATION

Made with plant-based backing and recycled materials, SYNLawn technology leads the industry in sustainability.

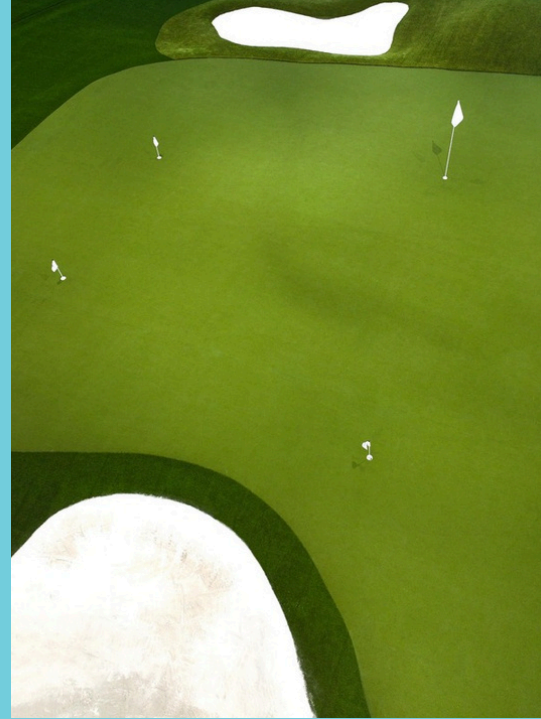

LOW MAINTENANCE

Reduce water, chemicals, and time spent on upkeep without compromising performance or quality.

DISCOVER THE NEW SYNLAWN TGL SYSTEM

TRUESTOP

The proprietary dual-layer impact-absorption technology in this underlayment is designed to receive shots from 160+ yards and in ensuring consistency, precision, and playability for every approach.

FRINGE & ROUGH

Durable and natural-looking, these styles mimic tight lies and rough conditions using commercial-grade blade technology, delivering a realistic golf experience for every shot.

PRECISION PUTT

Technologically advanced, this showcase product is the world's only triple-sheered putting green. Engineered with nylon fibers, it delivers smoother, faster, and truer ball rolls with a Stimp rating of up to 13. Available in two colors: Original Green and the new Natural Tri-Blend.

DID YOU KNOW?

SYNLawn competed in "blind" shot and putt tests against products from all over the world. We aced it. There is only one Official Synthetic Surface Partner of TGL, SYNLawn.

THE OFFICIAL SYNTHETIC SURFACE PARTNER

FAQS & COMMON CONCERNS

Can I chip onto my green?

Yes. Greens customized with Classic Pitch & Precision Putt® are designed to receive chip & pitch shots up to 160+ yards with TrueStop™.

Is the surface adjustable for speed?

Yes. SYNLawn turf systems are paired with underlayment materials like TrueStop™ to fine-tune green speeds.

Is DIY installation possible?

While small greens may be self-installed, SYNLawn recommends certified installation for optimal performance.

Are SYNLawn greens pet-safe?

Yes. SYNLawn turf is non-toxic and safe for pets. For best results, designate a separate pet relief area.

How do greens hold up in harsh climates?

SYNLawn turf is engineered for durability in extreme temperatures and weather conditions.

PROJECT INSPIRATION & CASE STUDIES

Real-world projects showcase SYNLawn Golf's versatility:

Backyard Golf Paradise, Florida: A multi-tier green with undulations, fringe, and lighting overlooking the ocean.

Augusta Replica, New York: A high-end residential project modeled after the famous Amen Corner hole, featuring fringe, bunker, and water hazards.

Del Webb, Fulshear, Texas: Resort-style community course installed to deliver a premium, low-maintenance golf experience with pro-grade turf and custom contours.

WHAT OUR CUSTOMERS ARE SAYING:

“

We went with SYNLawn for a variety of reasons. From the initial site visit to the install, everything was smooth, professional and done with quality and care. The SYNLawn team provided options that fit our budget, our needs and intended use for the lawn - we were able to select exactly what we wanted. The install team was careful when coming through the house, covered the floors and ensured the walls and other interior spaces were prepped before working. They finished on schedule (less than a full day install) and the lawn was immediately ready for use which was amazing.

Highly recommend! - Chris A.

”

“

We used SYNLawn to renew our otherwise inhabitable backyard. The price was well within my budget, and the work was beyond professional. The unwanted and invasive plants were swiftly removed and disposed of, with the installation just as smooth. Everyone knew what they were doing and worked in unison for maximum efficiency. The end result is exactly what we wanted: an inviting, picturesque backyard we can be proud to use, show, and host gatherings.

After being burnt by many other local contractors that never delivered even an estimate, SYNLawn flipped that script and provided the exact product we wanted with speed and professionalism.

If you want results, good communication and efficient work, my recommendation is 100% for SYNLawn. - Eduardo L.

”

“

Fantastic experience from beginning to end. SYNLawn took great care of everything and were super communicative throughout the install. The entire crew were super friendly, super professional and did a fantastic job. I hate spending money, but this is an investment that I can immediately say I am very happy with. I cannot say enough good things about everybody involved. Thank you!!! - Eric E.

”

CHEAP TURF ISN'T ALWAYS A BARGAIN

In the turf world, "cheap" often means cut corners, not real savings. Low-cost turf can lead to costly repairs, constant maintenance, or full replacement after just a couple of years due to *poor durability and lack of warranty support*.

Choose long-term value *AND* long-term savings over one-time savings.

Invest in quality with SYNLawn.

THE OTHER GUYS

VS

SYNLAWN[®]
GOLF

SYNLAWN VS THE OTHER GUYS

Feature/Benefit	SYNLawn®	The Other Guys
Custom Design & Installation	✓ Tailored to your space, skill level, and goals	⚠ Limited customization; cookie-cutter designs
Pro-Level Performance	✓ Engineered for true ball roll and realistic speed	⚠ Inconsistent performance; may not match real greens
Precision Turf Technology	✓ Uses advanced synthetic fibers and backing systems	⚠ Generic turf not optimized for golf
Environmentally Friendly Materials	✓ Bio-based backing, recyclable components, and manufactured PFAS-free	⚠ Petroleum-based materials, non-recyclable, made with PFAS
Drainage & Weather Resistance	✓ Excellent drainage and all-weather durability; anti-microbial	⚠ Poor drainage may cause pooling, damage, and mold growth
Low Maintenance	✓ No mowing, watering, or fertilizing	⚠ Some systems still require upkeep or re-leveling
Professional Grade Installation	✓ Installed by certified SYNLawn Golf experts	⚠ Subcontracted or non-specialist installers
Customizable Contours & Fringe	✓ Add realistic breaks, fringe grass, and tee boxes	⚠ Limited design options; often flat and basic
Kid & Pet-Friendly	✓ Safe & non-toxic materials; Stain & odor resistant	⚠ Made with harmful substances, little-to-no resistance to stains and odors
Longevity & Warranty	✓ Industry-leading limited lifetime warranty & workmanship warranty on installation	⚠ Shorter warranties; turf wears faster
Trusted by PGA Pros & Coaches	✓ Used by Dave Pelz & top golf institutions	⚠ No professional endorsements
